Forecast for Wednesday 16 Mar 2022

Weather: Rain/snow and hill fog clearing quickly east through the early hours. A chance of some valley fog through the first part of the morning, otherwise a dry bright and often sunny day.

Chance of cloud-free hill tops above 700m: 90%, most summits free of cloud.

Low cloud and visibility: Mostly very good visibility, but locally very poor in isolated valley fog at first.

Meteorologist's View

Nothing to add.

Forecast for Thursday 17 Mar 2022

Weather: Mainly dry through the early hours. Cloud will thicken early-morning with a band of rain quickly moving east, with scattered blustery showers following in behind through the afternoon, falling as sleet or snow on higher summits. Strengthening southwesterly winds into Thursday morning, with gales or severe gales on exposed summits and ridges, becoming westerly by the afternoon and easing.

Maximum wind: Southwesterly mean 35-40 mph gusting 50-60 mph through the morning, easing later.

Chance of cloud-free hill tops above 700m: 90% or more overnight, lowering 30% through the morning, and improving 80% through the afternoon.

Low cloud and visibility: Mainly excellent visibility overnight. Moderate or poor visibility in the morning in rain and summit snow, and occasional hill fog, with cloud bases 400-600 m. Improving good through the afternoon, temporarily lowering to moderate in showers, with cloud bases 500-700 m.

Temperature: **Valleys:** Plus 4 Celsius rising plus 8 Celsius by midday, falling plus 4 Celsius through the evening.
At 700m: Zero Celsius rising to plus 4 Celsius by midday, falling zero Celsius by evening.
Freezing level: 700 m rising above summits by mid-morning, falling near summits by evening.
